## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a control circuit for controlling an optical disk drive comprising a frequency detector, a phase detector, a low-pass filter, a voltage-controlled oscillator, and a controller, classified in class 369, subclass 47.28.
  - II. Claims 12-18, drawn to a method for controlling an optical disk drive comprising monitoring a DPLL signal, generating first and second control signals, and generating the DPLL signal based on the first control signal when the optical disk drive is in a non-seek mode, while generating the DPLL signal based on the second control signal when the optical disk drive is in a seek mode, classified in class 369, subclass 47.23.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus-as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the claimed method for controlling an optical disk drive can be practiced by another materially different apparatus, such as a control circuit that is able to generate a DPLL signal based on a first control signal when the optical disk drive is in a non-seek mode, which is not required by the control circuit of claim 1.

Art Unit: 2652

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Winston Hsu on January 3, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Vincent Agustin whose telephone number is 703-305-8980. The examiner can normally be reached on Monday-Friday 9:30-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Thi Nguyen can be reached on 703-305-9687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
